NEW

15 Stops – Super Stopper

100mm

The LEE 100mm System has a couple of essential elements you'll need to use our filters, and a wide range of optional accessories that give total flexibility.

Watch the 100mm Video

Inspiring Professionals

RESULTS

What is the LEE System?

100mm

Filter holder

Adaptor rings

At the core of the LEE Filters system is the holder, which comes assembled with two filter slots but can easily be adapted to take up to four filters.

The holder is designed to be compatible with 100mm filters – our standard width. To fit the holder to the lens, an adaptor ring is required.

There are two types of LEE Filter adaptor ring: one for general use, and one for wide-angle lenses.

20100-FGSS	Glass 100x100mm Super Stopper 15st	242.00	220.00

The new **Super Stopper** works well in harsh midday sunlight - traditionally considered an unfavourable time to shoot. However, with this filter the softness that arises from any movement contrasts pleasingly with areas of bright light, creating an effect rarely seen before now.

Super Stopper

15 stops

The Super Stopper
Made from high quality
optical glass.
